

## Replacing the door

Product code 51193 contains: One complete door

The following tools are needed: Flat pliers or special tool to mount the bauart spring, buy [here](#).

### How to change the door step by step:

- Open the door.
- Remove the [bauart spring](#) with a pair of pliers or the [special tool](#).
- Remove the 2 pins which hold the door and take the door out. If the pins are blocked, remove the safety rings by using the flat pliers.
- Mount the new door.
- Remount the 2 pins (and the safety rings) in the hinges.
- Remount the bauart spring. However, this is only mandatory in Germany.

Hereafter you can use your stove again.
